Section 4

AI Wasat Newspaper Frequency and Reach Analysis

Part 1: AI Wasat Reach Analysis

Campaign Reach Featuring Al Wasat Arabic Daily

In this section we will discuss the Reach and GRP levels that are obtained by **Al Wasat Arabic Daily** newspaper.

On overall, around 38% of the Arab Adult population in Bahrain can be reached through **Al Wasat Arabic Daily** newspaper using a campaign of some 22 insertions reasonably spread for example over a period of two months. This estimate is illustrated in the table below.

Reach build-up is very fast climbing from 22% at one insertion to 30% at 4 insertions, then it continues to climb gradually to attain 34% at ten insertions. The reach curve continues to rise slowly to hit a plateau of 38% at 22 insertions

Number of insertions	1	2	3	4	6	10	22	25
Reach % attained at each number of insertions	22	26	28	30	31	34	38	38

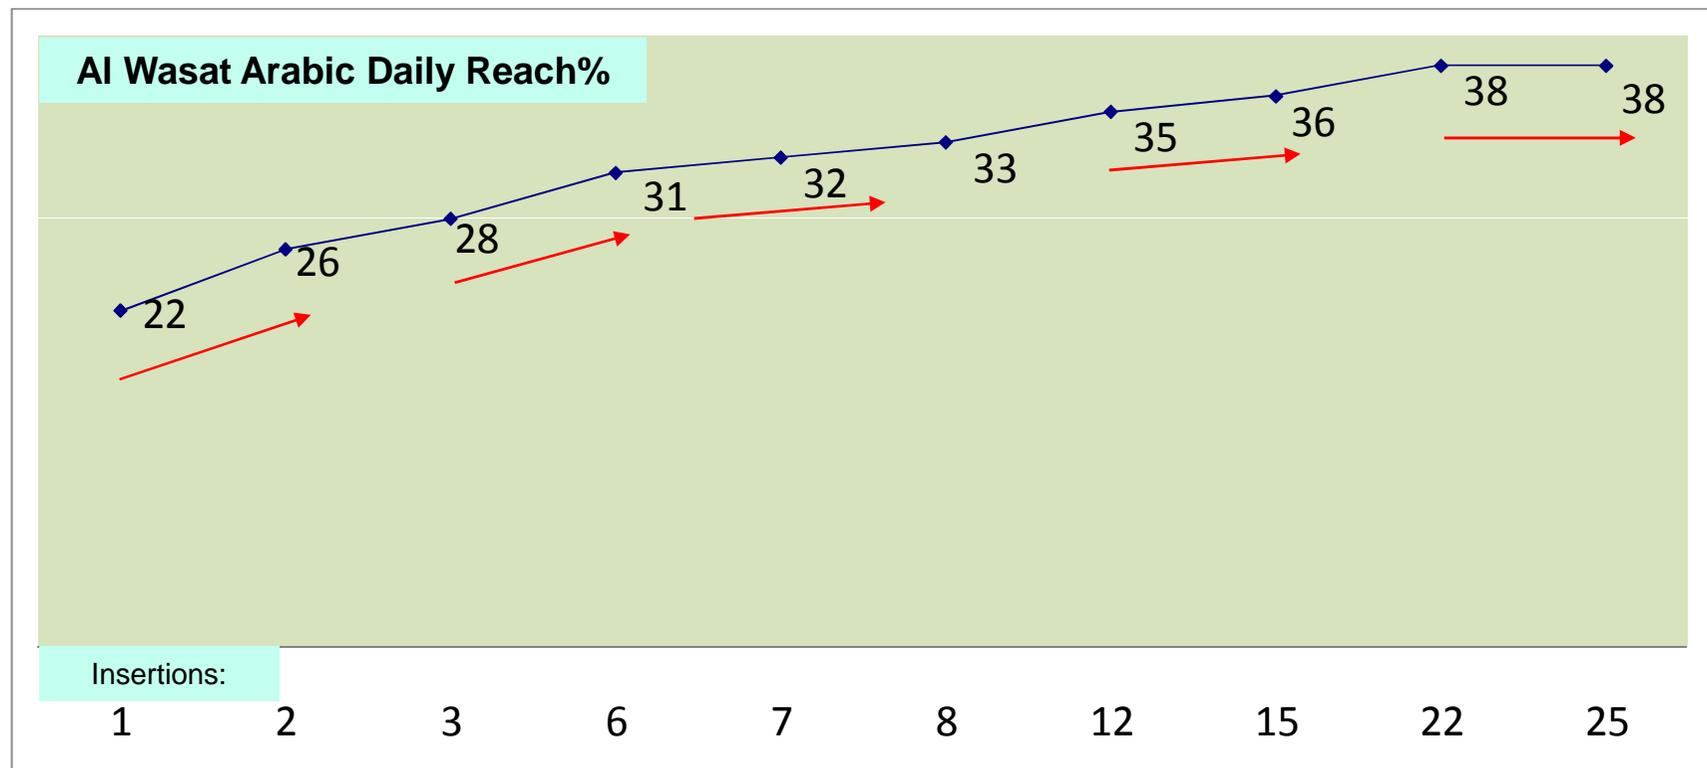

Reach = 30%
after 4 insertions

Campaign Reach Featuring Al Wasat Arabic Daily

Reach is estimated at OTS levels and does not take into consideration the readers' affinity with advertised product or brand, or the creativity level of the ad execution.

It is understood that as number of insertions increases, Reach continues to build-up until it attains a stable level where the gain of Reach at increasing frequency levels becomes marginal and statistically not significant wherein the trend tends to take an asymptotic direction.

Assuming a 100% OTS Theoretical Exposure

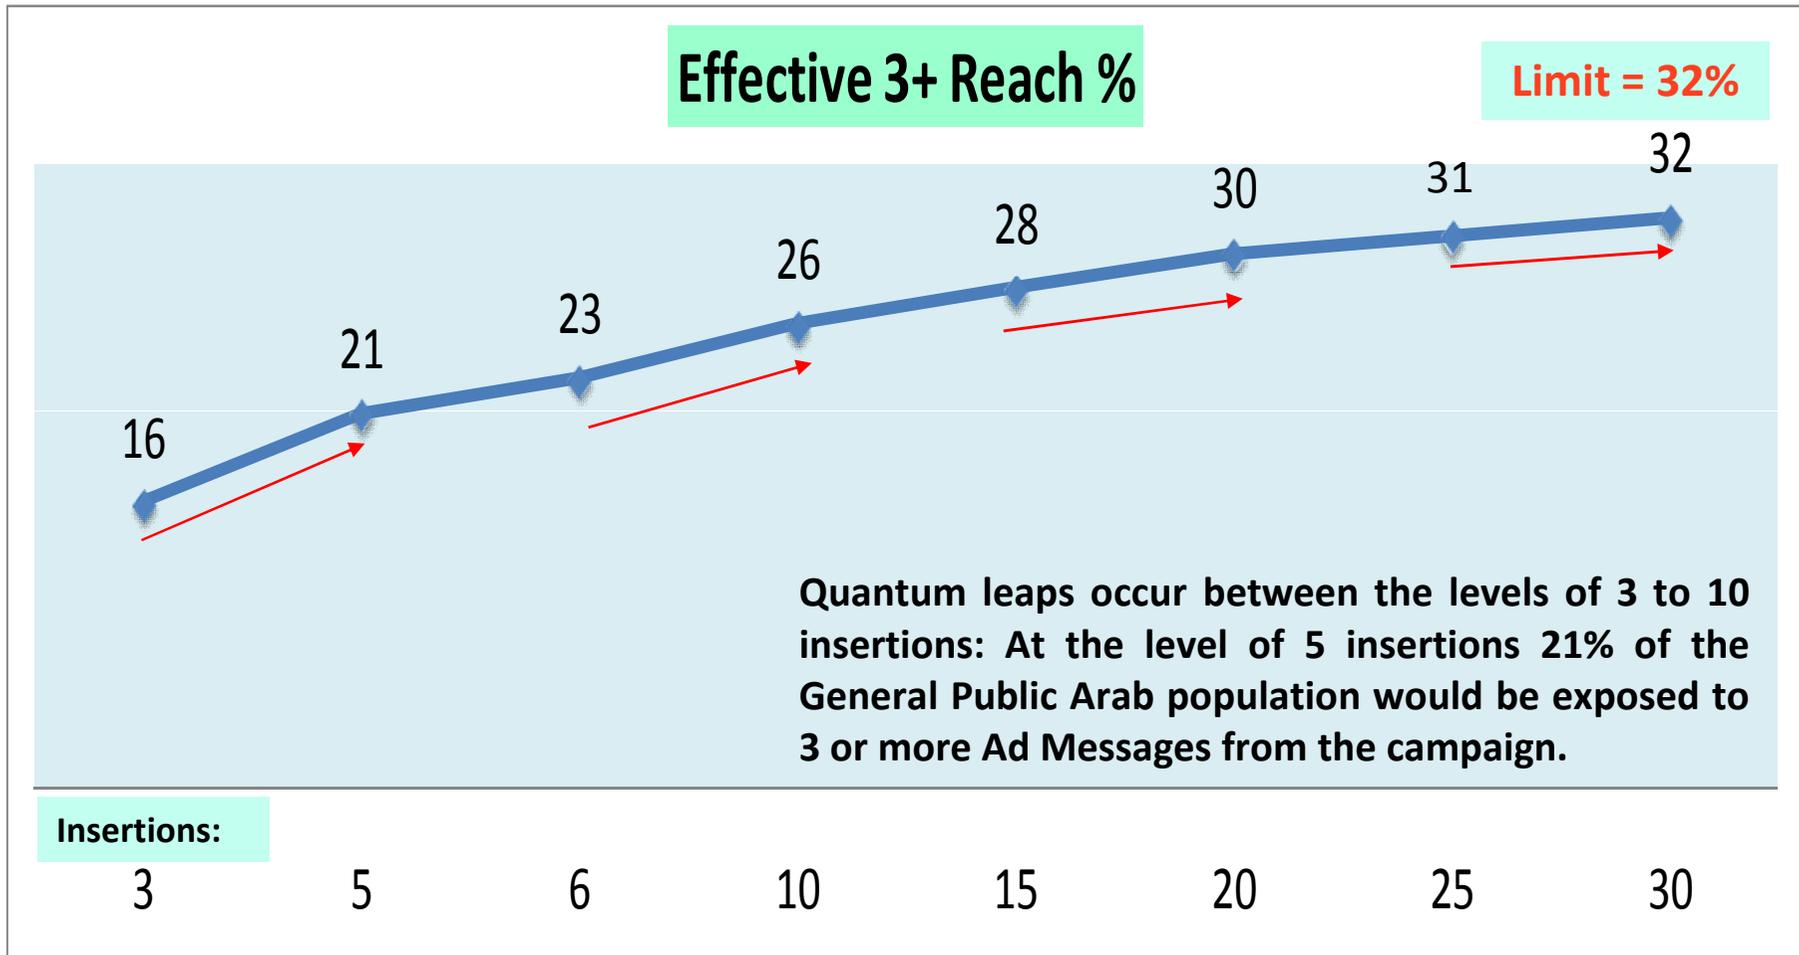

Campaign Reach Featuring Al Wasat Arabic Daily

The largest gain in Reach occurs in the early part of the campaign, climbing very fast from the first 4 insertions. Thereafter Reach continues to increase in smaller leaps (less than 2% of Arab target population) until it attains a stable limit at 38% where the curve takes a nearly horizontal path.

The minimum average of 3 exposures per reader, being considered as a threshold level above which advertising message registration is likely to trigger consumer interest in the advertised product, leading to decisions and actions. Thus successful campaigns tend to operate better in the range of 3+ average exposures per target member within a unit of time (related to product cycle).

The following line chart presents the estimated Reach of a campaign using Al Wasat Arabic Daily with different insertion levels based on the audience who would register 3+ exposures or more.

Al Wasat Arabic Daily Effective Reach at 3+ Exposures: Target receiving 3 or more Ad Message exposures at different insertion levels

AI Wasat Newspaper Frequency and Reach Analysis

Part 2: Reach Analysis of AI Wasat with Rivals in Combined plans

Campaign Reach Featuring Al Wasat Arabic Daily in combination with One Rival Title

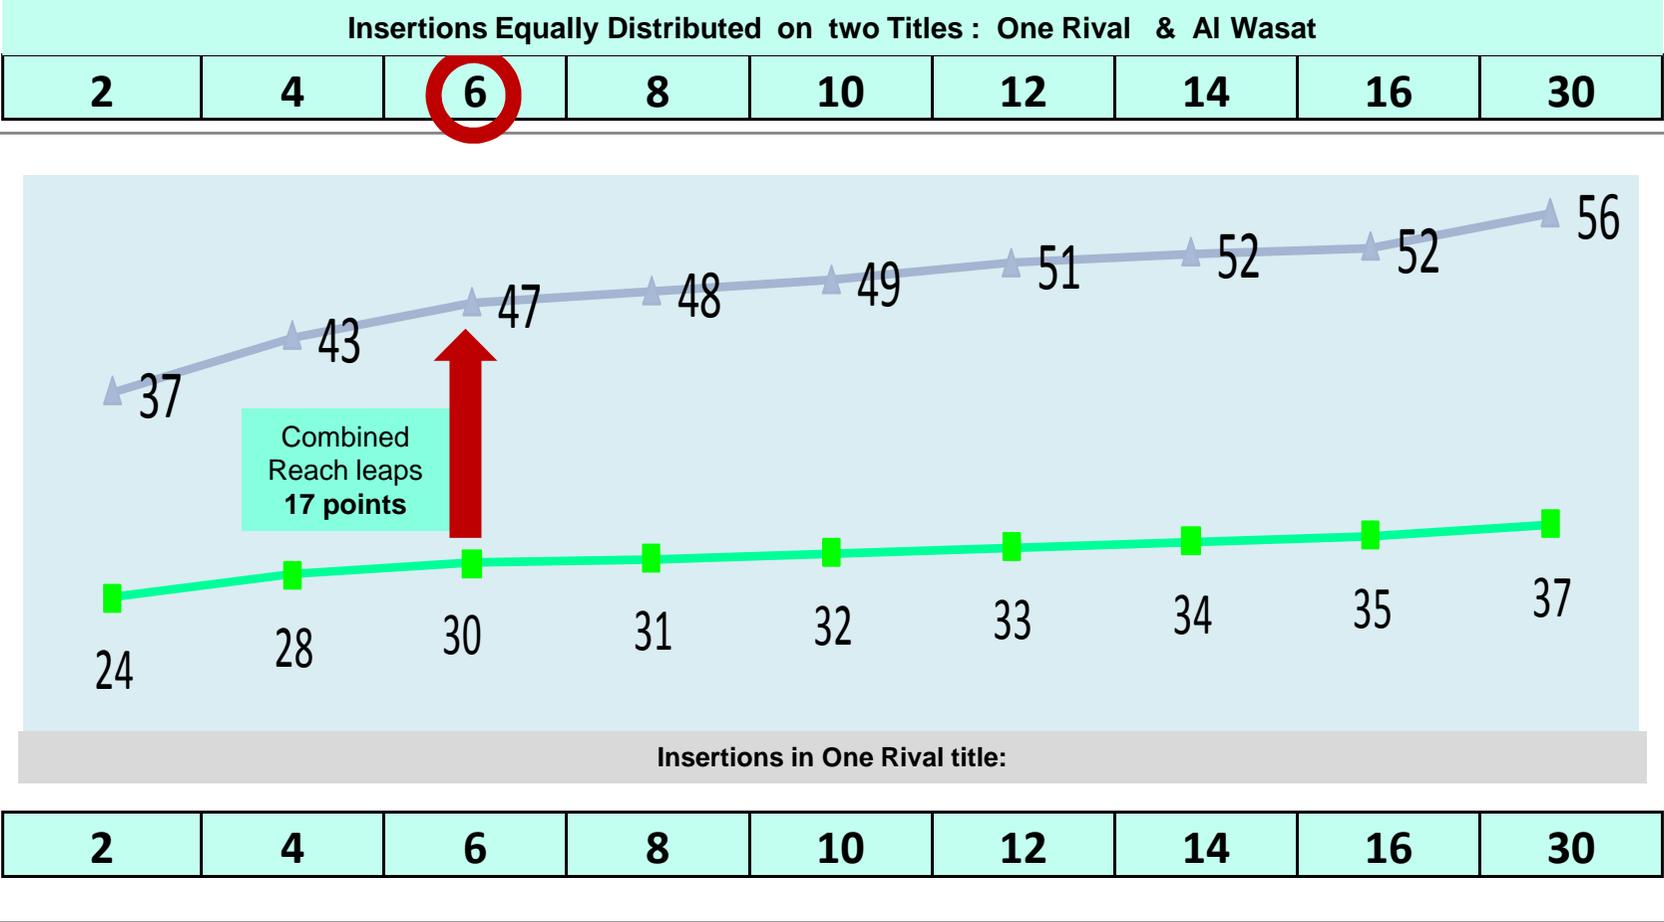

Al Wasat brings a fresh supply of exclusive readers that substantially increase Reach in combined plan with any one Rival Title :

- Adding Al Wasat Arabic Daily into a campaign schedule initially using **one** Rival title increases substantially the overall Reach as the curve will show

Compare Reach level (30%) that would have been attained using all 6 insertions in Rival title vs. Reach (47%) obtained upon including 3 insertions in Al Wasat

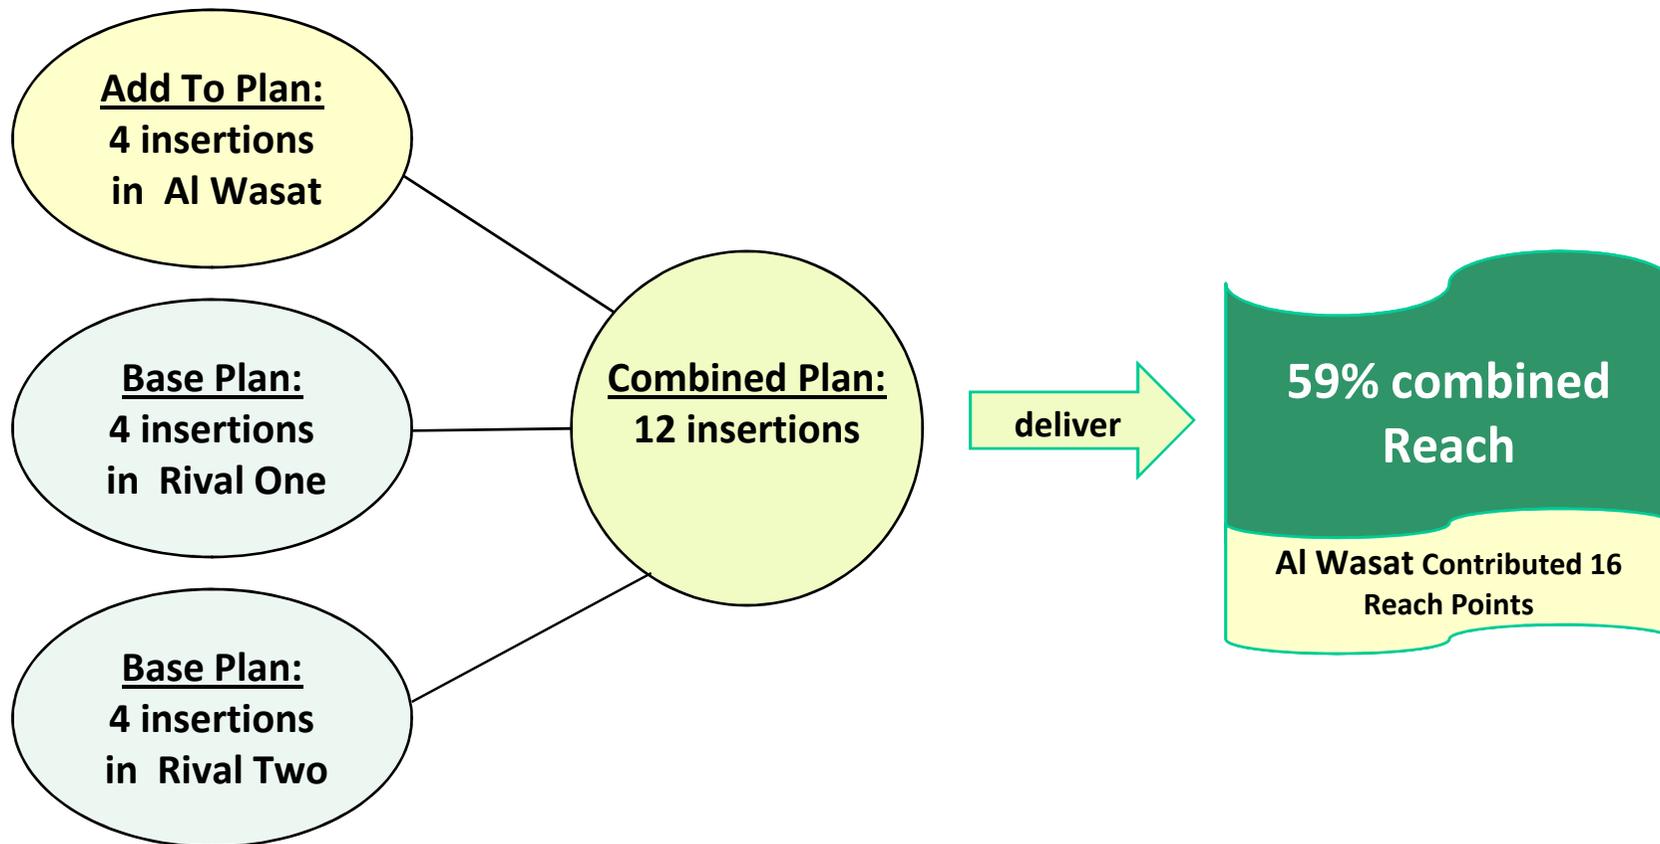

Campaign Reach Featuring Al Wasat Arabic Daily in combination with One Rival Title

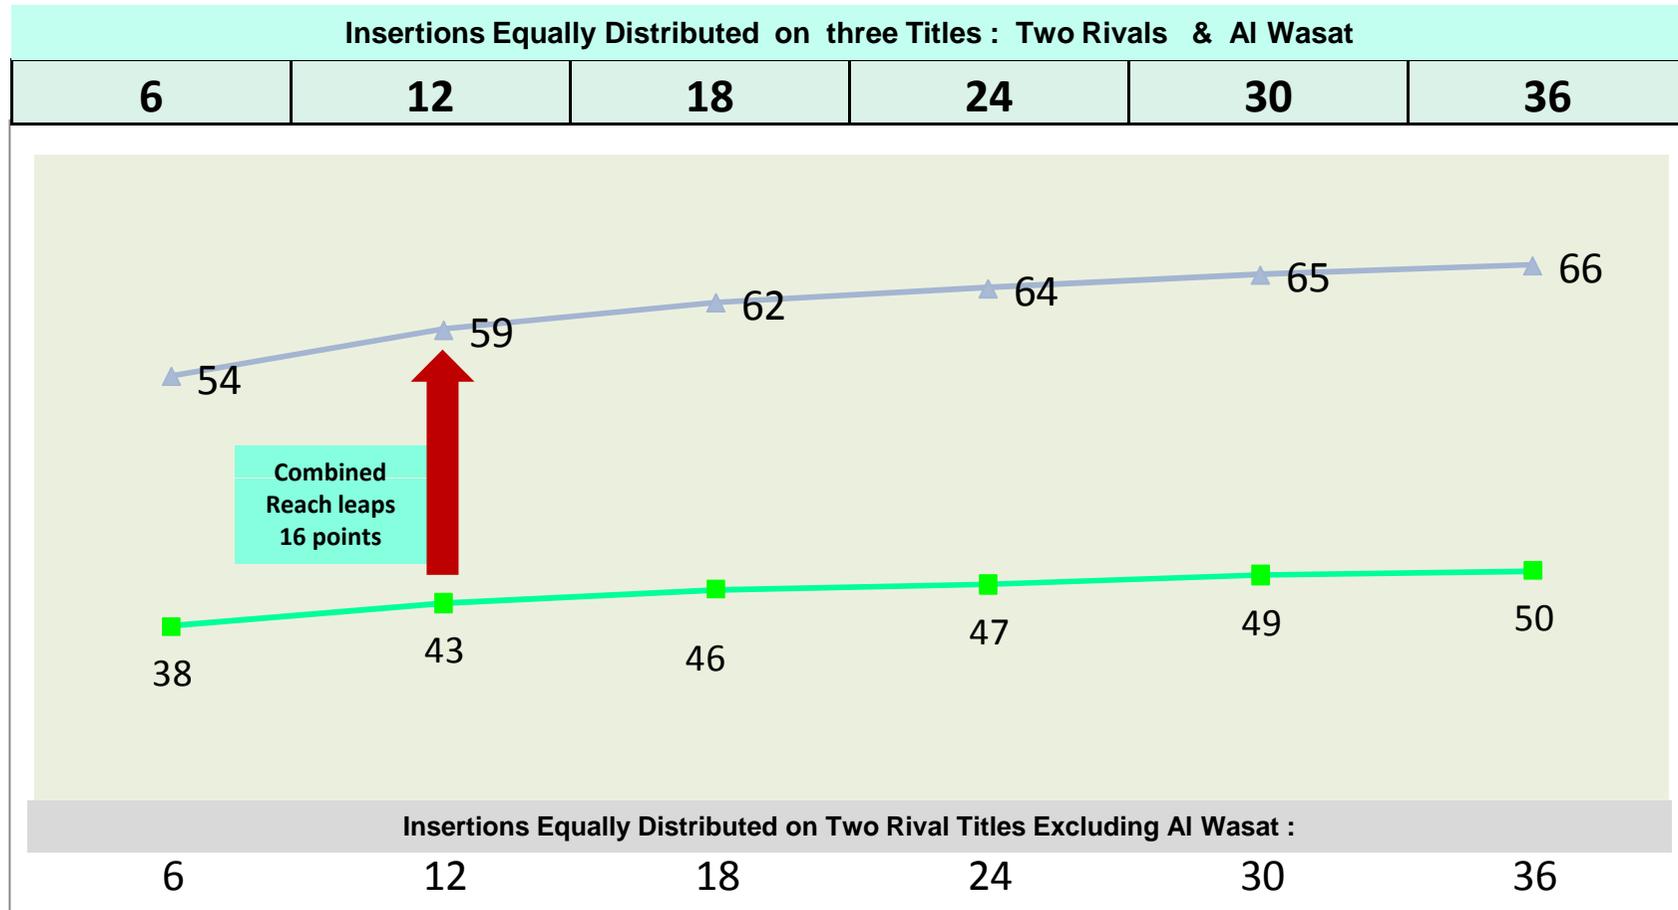

Assuming a 100% OTS Theoretical Exposure

Campaign Reach Featuring Al Wasat Arabic Daily in Combination with Two Rival Titles

- Adding Al Wasat Arabic Daily into campaign schedules using **Two** Rival Titles increases substantially the overall reach as the curve will show.

Campaign Reach Featuring Al Wasat Arabic Daily in Combination with Two Rival Titles

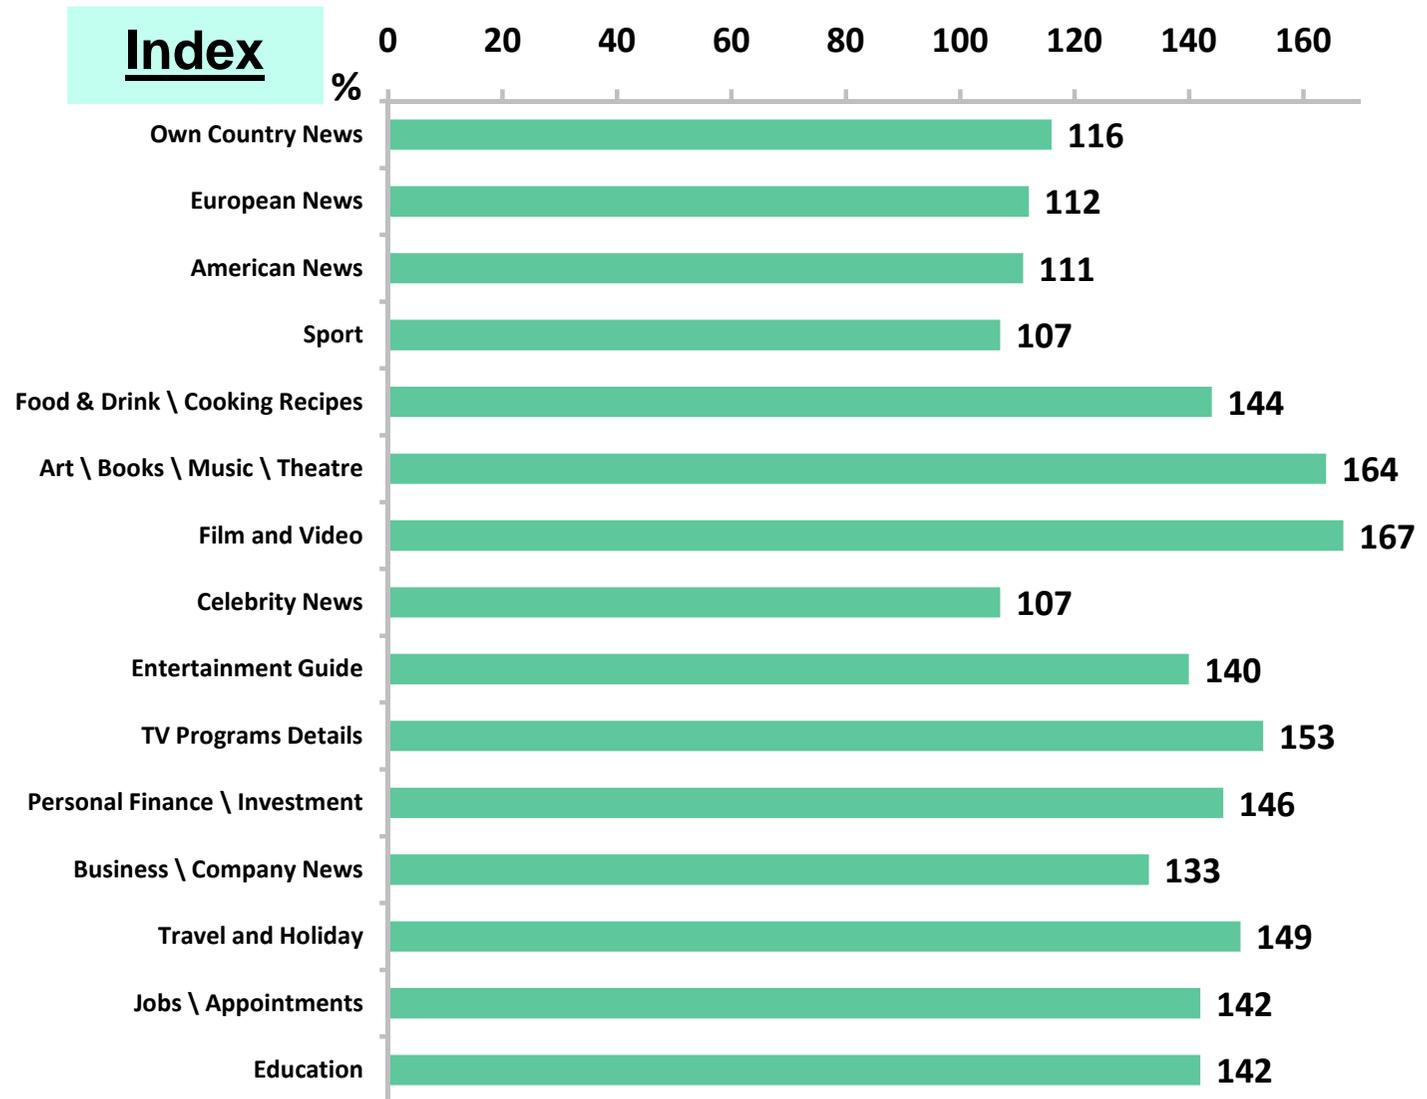

Assuming a 100% OTS Theoretical Exposure
